

Fourth Quarter Report, 2002 - Juvenile Hall Data

Gender Distribution in Juvenile Halls

In the 1st Quarter of 1999, males constituted 85.3% of the Juvenile Hall population. As of the 4th Quarter of 2002, males constituted 82.9% of the population. During that span of time, the male population decreased by 6%, and the female population increased by 12.5%. If the ratio of females versus males continues to change as it has since 1999, within a few years, the impact of females on Juvenile Hall populations will force significant changes in the areas of construction and programming in these facilities.

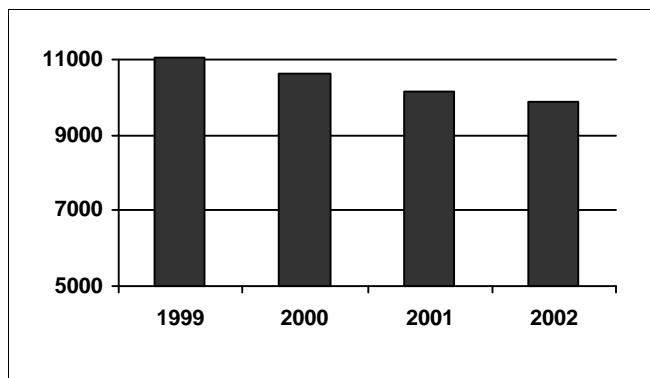

Summary of Males in Juvenile Halls

1999	2000	2001		
85%	84%	83%

Q1	Q2	Q3	Q4	Average
82%	82%	82%	83%	82%

Average Number of Juveniles Booked per Month

The average number of juveniles booked into Juvenile Halls has declined yearly since 1999. In 1999, 11,067 juveniles were booked into Juvenile halls each month. By 2002, the average number had declined to 9,860 per month, and almost 11% decline in four years. As with ADP and Pre-dispositional cases, this decline suggests that alternative community sanctions are having an impact. However, as with the decline in ADP, we expect that the number of bookings to once again begin to rise. This prediction is the result of a number of factors, including the steady rise in the size of the at-risk population in California, and the national and State indicators of recent general increases in the crime rate.

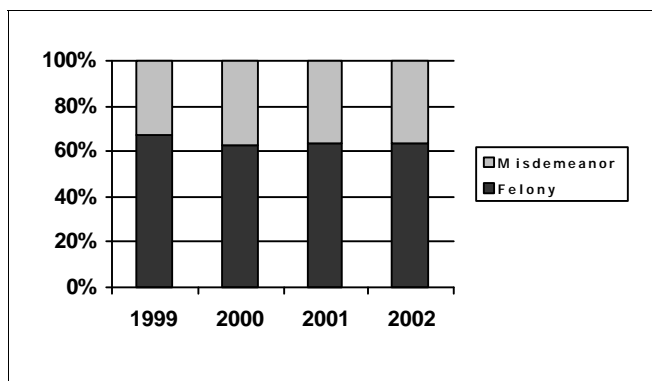

Summary of Juveniles Booked per Month

1999	2000	2001		
11,067	10,641	10,137		

2002 Summary of Monthly Bookings

Q1	Q2	Q3	Q4	Average
9,906	10,209	9,694	9,636	9,860

Distribution of Charge in Juvenile Halls

One unanticipated finding of the Juvenile Detention Survey is the consistent percentage of felony-charged minors in Juvenile Halls. Since 2001, 64% of the juveniles detained in Juvenile Halls had felony charges. The stability of this percentage is interesting in light of the fact that in the adult jail system, the percentage of inmates with felony charges has been rising steadily since 1995. We need to continue to gather information regarding this finding while watching the numbers in order to determine the implications.
